50X1-HUM

1. An aqueduct 35 kilometers long, between Plitvicko Jezero and Mocile, scheduled for completion by the end of August.
2. On 4 August work began at Becej on the construction of a large canal which will link the northern Yugoslav section of the Danube with the southern Yugoslav section via the Tisa river.

Comment: It is believed that reference is made to the projected Staribecej-Petrovgrad-Botos canal.)

50X1-HUM

3. With the object of preventing serious floods, work has begun on reinforcing certain sectors of the rivers Mura, Drava and Trnava in the Medjumurje. Part of this work was begun last year. Work on reinforcing river banks is being concentrated at present in the following areas:

Otok - on the river Drava

Varazdin - on the river Drava

Kotoriba - on the river Mura

Dekanovec - on the river Mura
